Art Unit: 2183

Claims 1-45 are subjected to restriction requirements.

- I. Claims 1-27, drawn to a logic system with input/output interfaces, classified in class 326, subclass 63.
- II. Claims 28-38, drawn to the starting of the starting of logic operation with evaluation of conjunct and selectively short circuiting Boolean expression portion, classified in class 712, subclass 223.
- III. Claims 39-41, drawn to a storage system with the increment of memory line, classified in class 711, subclass 219.
- IV. Claims 42-45, drawn to a system with storage seek and found lines, classified in class 714, subclass 730.

The inventions are distinct, each from the other because:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as a system which did not have the starting of the starting of logic operation with evaluation of conjunct and selectively short circuiting Boolean expression portion. See MPEP § 806.05(d).

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are

shown to be separately usable. In the instant case, invention I has separate utility such as a system which did not have a storage system with the increment of memory line. See MPEP § 806.05(d).

Inventions III and IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate

utility such as a system which did not have a system with storage seek and found lines. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
